

Importing a ShopMap resource from Pandora

You can import ShopMap resources from the Pandora software to save time. PLA is able to read the .dat files that Pandora stores in its ShopMap.

1. Click the **ShopMap** tab.
2. Click the tab for the type of resource you want to import—for example, **Substrate**, **Press**, or **Plate**.
3. In the Import ShopMap dialog box, navigate to the ShopMap directory that you are using for Pandora.
Note: If you want to import only selected ShopMap resources (for instance **Substrate**), select its folder. If you select the main ShopMap directory, PLA will import all relevant resources and place them in the tab to which they belong.
4. Select the relevant ShopMap folder and click **Open**.
