

Using single JTPs for urgent processing

To use a single JTP for urgent processing, you must first remove the JTP from the JTP system pool. For more information, see [Removing JTPs from system pools](#).

1. In the Process Template dialog box, in each section, in the **JTP** boxes, select the JTP(s) you removed from the system pool(s).
2. To save the process template, from the **File** menu, select **Save**.
3. Submit the urgent input files to the new process template.
