

Linking Preps Templates, Marks, and Printer Configurations to Prinergy Evo

The Preps Folders dialog box enables you to map to the location where you stored your Preps templates, Marks files, and device configurations. Once mapped, Prinergy Evo can read the files and you can select the files and configurations in the create imposition process template.

1. In the Process Viewer, **System** menu, select **Preps Folders**.
2. In the Preps Folders dialog box, in the **Template and Marks** area, click **Set** to locate the Preps imposition templates marks files.
3. In the **Printer** area, click **Set** to locate Preps device configuration settings.
4. Click **OK**.

Prinergy Evo displays the Preps imposition templates and device configurations in the Create Imposition process template dialog box.
