

Submitting Preps files

The type of imposition plan you create in Preps, the type of file you print to, and the submission channel to which you submit the Preps files all determine what Preps files you need to submit to your system. Use the Preps **PDF-to-PDF** workflow when creating imposition files.

Preps workflow	Creates
Mixed PS	PJTF file and Marks.PS file
	JDF file and Marks.PS file
PDFPDF	PJTF file (the Marks information is embedded in the PJTF file)
	JDF file and Marks.pdf file

All marks PostScript files must be converted to PDF files using the Prinergy Marks Acrobat Distiller settings or the refine to PDF marks process template. See [Distilling page and sheet mark PostScript files to create PDF files](#).

Preps file	Submit via hot folders:	Submit via template palette:
Mixed PS PJTF file	The PJTF file and marks PDF file at the same time from the same location.	The PJTF file only. The marks PDF file must reside in the same location as the PJTF file.
Mixed PS JDF file	The JDF file and marks PDF file at the same time from the same location.	The JDF file only. The marks PDF file must reside in the same location as the JDF file.
PDF PDF PJTF file	The PJTF file only. The marks information is contained in the PJTF file.	The PJTF file only. The marks information is contained in the PJTF file.
PDF PDF JDF file	The JDF file and marks PDF file at the same time from the same location.	The JDF file only. The marks PDF file must reside in the same location as the JDF file.
