

Printing the job ticket from SignaStation

Best practice: Save the job ticket into the same folder as the refined PDF files used to create the imposition plan.

1. From the **File Menu**, select **Print**.
2. In the **Available Printers** area, select **unknown**.
3. In the **Output parameter** list, select the required option.
4. Click **Save**. In the Save dialog box, select a location and enter a file name.
The generated files must be saved in a location that the Prinergy Evo server computer can access.
Two files are created:
 - filename.jt.pjtf or filename.jdf, which is the job ticket (imposition plan)
 - filename.ps, which contains the marks information
5. Convert the marks (filename.ps) to PDF before submitting the imposition plan. If you have a refine to PDF workflow, the filename.ps information can be converted to PDF automatically when you submit the file to a refine to PDF template submission channel. Otherwise, use Acrobat software to distill the marks file, using the recommended settings.
