

What are the factory libraries?

The four PANTONE factory libraries are supported: PANTONE 1999: CMYK and L*a*b*, and PANTONE 2000: CMYK and L*a*b*.

The PANTONE factory libraries are a standard feature. The library consists of color definitions for 15,751 PANTONE colors.

The installation wizard automatically installs the four PANTONE factory libraries and loads them into the color database.
