

# Overriding color matches in refined PDF files

Override color matches in refined PDF files:

1. Create a output process template, for example, output from PDF or output from imposition.
2. In the **Spot Color Handling** section, in the **Source of Color Recipes** area, in the **User** and **Factory Library** lists, select the user or factory library that you want to use to override the color matches in your refined PDF file.
3. Set the remaining parameters as required.
4. From the **File** menu, select **Save**.
5. Submit the PDF file for output, making sure to attach the output process template you have just created to the hot folder or Template Palette that you are using to submit the PDF file.

Prevent your output file from overriding the color match settings:

1. Create a output process template, for example, output from PDF or output from imposition.
2. In the **Spot Color Handling** section, in the **Source of Color Recipes** area, in the **User** and **Factory Library** lists, select **None**.
3. Set the remaining parameters as required.
4. From the **File** menu, select **Save**.
5. Submit the PDF file for output, making sure to attach the output process template you have just created to the hot folder or Template Palette that you are using to submit the PDF file.
