

Changing the applied process template at the last minute

You might want to change the applied process template at the last minute for quick remakes of files or for one-time-only input files.

1. Drag your input file onto the template palette.
Important: The Prinerger Evo server computer must have read, write, and modify privileges on the folder from which you submit input files to Prinerger Evo. Kodak recommends that your input files reside on the Prinerger Evo server computer and you mount them from your Prinerger Evo client computer.
2. In the **Choose a Template** dialog box, click **Change**.
3. In the **Choose a Template** dialog box, select a new process template.
4. Click **OK**.
5. Complete the remaining parameters as required.
6. Click **Go** to submit the file for processing.
