

# Exporting history messages to text files

You may want to export history messages to a text file to send to your service representative for troubleshooting purposes.

1. From the **System** menu in the Process Viewer window, select **System History**.
2. From the **File** menu, select **Export History**.
3. In the Export History dialog box, in the **File name** box, type the name of the export file.
4. In the **Save in** box, select where you want to save the export file.
5. Click **Save**.
