

# Setting Other parameters

1. In the Parameter Configuration interface, select **Other**.
2. To set other parameters and confirm that you want the file inspected for those parameters, select the **Enable** check box.

If **Enable** is not selected, the other parameters will not be inspected.

<b>Flat Tint Min. Dot Percentage</b>	<p>Check for flat tint objects with dot percentages less than the specified minimum dot percentage.</p> <p>This check will not inspect flat tint objects with a dot percentage of 100%.</p>
<b>Flat Tint Max. Dot Percentage</b>	<p>Check for flat tint objects with dot percentages greater than the specified maximum dot percentage.</p> <p>This check will not inspect flat tint objects with a dot percentage of 100%.</p>
<b>Include Solid</b>	<p>Check for flat tint objects with a dot percentage of 100%.</p>
<b>Gradient Min. Dot Percentage</b>	<p>Check for gradient objects which include a dot percentage that is less than the specified minimum dot percentage.</p>
<b>Gradient Max. Dot Percentage</b>	<p>Check for gradient objects which include a dot percentage that is greater than the specified maximum dot percentage.</p>
<b>Min. Object Size</b>	<p>Check for objects which are less than the specified minimum object size.</p> <p>The units used to specify the object size should be the same as the units used in the Adobe Illustrator Preferences.</p>
<b>Min. Gap</b>	<p>Check for gaps with a width less than the set width of Gap, and highlight the Gap area with current guideline color. The default value is 0.1mm and the range is from 0 to 0.5mm.</p>

<b>Check on Non-Print Layers</b>	Check for non-printing layers in the current job. Preflight checking of non-printing layers is not supported.
<b>White Overprint Object</b>	Check for white objects with an overprint attribute in the current file.
<b>Black Knockout Object</b>	Check for black knockout objects which equal or exceed the dot percentage in the current file.
