

Box Tool

Box

Use the **Box** panel to select, preview, and configure carton box styles.

Select a Box Style

1. In the left panel, go to **Category Box Carton**.
2. Click a box type, then choose a specific style.
3. The selected box will appear on the right with:
 - A **2D unfolded view**
 - Default **Length, Width, and Height**

Available Box Types

You can choose from the following carton styles:

- Double-tuck boxes
- Snap-lock boxes
- Self-locking boxes
- Divided-bottom boxes
- Hanging hole boxes
- Handle boxes
- Flat-glued boxes
- Tray-style boxes
- Flip-top boxes

Configure Box Settings

Use the controls on the right panel to adjust your box:

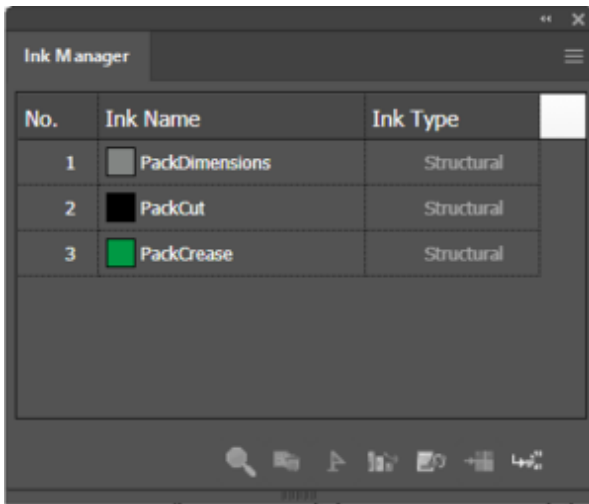

- **2D / 3D Toggle**
Switch between flat (2D) and assembled (3D) views.
- **Length / Width / Height**
Modify the box dimensions.

- **Thickness**
Adjust the material (paper) thickness.
- **Open**
Place the selected box onto the artboard. The interface will minimize automatically.

Understanding Line Types

When the box is placed on the artboard, different line types are used:

- **PackCut** — Cutting lines
- **PackCrease** — Folding lines
- **PackDimensions** — Reference (auxiliary) lines

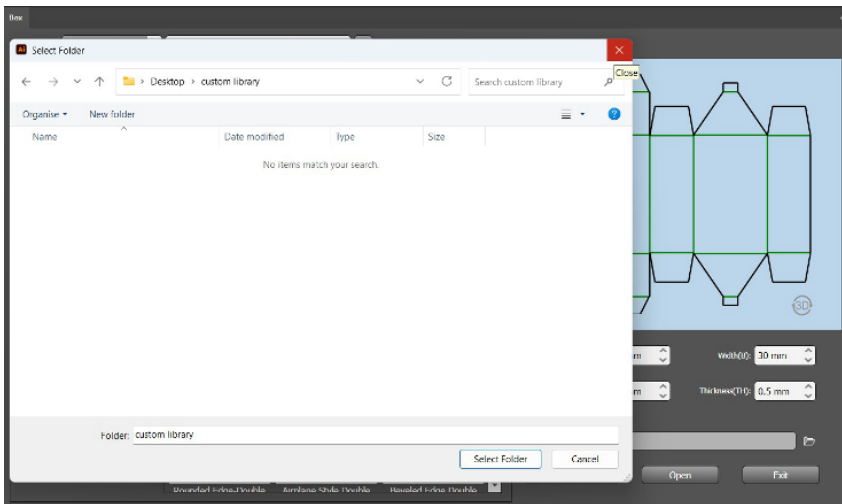

Customize Library

Use the **Customize Library** to import and manage custom box designs.

Open the Custom Library

1. Click the **Customize Library** icon.
 2. Select a folder to store your custom files.
- Once selected, the folder path will be displayed in the interface.

Import CAD Files

1. Click **Import CAD**.
2. Select **.dxf** or **.cf2** files.
3. Imported files will appear in the library for future use.
