

# Preparing to install client computer software

Review this checklist before installing Workshop on client computers.

1. Confirm that Prinergy is correctly installed on the server.  
Review the *Prinergy Presite Worksheet* or contact your sales representative.
2. Review the software that you are going to install on the client computer and ensure that you meet all of the licensing requirements.
3. Ensure that the client computers meet the minimum or optimum hardware recommendations as required.
4. Connect the client computers to the server.
