

Starting Prinerger

Use Prinerger Administrator to start the Prinerger Server software on one or more servers.

1. From the **File** menu, select **Start Prinerger**.
2. If you have more than one Prinerger server, in the Start Prinerger dialog box, perform one of the following actions:
 - To start Prinerger on all Prinerger servers in the Prinerger system, select **All Servers**.
 - To start Prinerger on the most recently selected server(s), select **Selected Server**.

Tip: To simultaneously select multiple servers, hold down the **Shift** key and click the server names.

Note: Prinerger must be running on the primary server before you can start Prinerger on a secondary server.
3. Click **Start**.

Prinerger may take a moment to start up. You can watch the processes start in the **Processes** pane.
