

Web browser access

Documentation and some software components are available through a web browser over HTTP.

Note: If your system has a firewall, you may need to open the ports listed below.

In the following URLs, replace <server> with the name of your Prinergy primary server.

Documentation

Documentation	URL and port
RBA Reference	http://<server>:61235/en/AutoDoc/Index.html
Administrator Help	http://<server>:8082/help/
Workshop (Connect) Help	http://<server>:8083/help/
Workshop (Powerpack) Help	http://<server>:8084/help/
Dashboard Help	http://<server>:8085/help/

Note: Depending on your site's needs, only one type of Workshop Help—Connect or Powerpack—may be available. The help systems are configured when Prinergy is installed.

Software components

Use	URL	Port
Track	http://<server>/prinergy/track	80
Setup	http://<server>/prinergy/setup	80
InSite	http://<server>/Site/Pages/login.aspx	80, unless InSite is using SSL, operates in a DMZ, or requires other specific configurations
Dashboard	http://<server>:80/Dashboard	80, unless 80 is used, in which case Dashboard uses 51234
