

Viewing licensed options

Use this procedure to view your licenses, including what options are licensed and their expiry dates.

- 1. On the primary Prinerger server, from the **License** menu, select **Manage License Key**.
- 2. In the **Unique System ID** box, view the identification code for the dongle that is attached to your system.
- 3. In the **License Keys** box, select the license key that you want to view information about.
- 4. View the information about that license, including:

Item	Identifies
Option column	The name of the option—for example, the JTP name
Instances column	The number of instances of the option that you are licensed to use. For example, here is where you can see how many Refine JTPs you are entitled to run on your system.
Expiry Date column	The date the option expires—for example, you may be using some options on a trial basis

- 5. Repeat steps 3 and 4 for each item in the **License Keys** box.
