

Removing a license key

Before adding a new permanent base license key, remove the old permanent base license. Prinerger allows only one base license on a system at a time.

1. Stop Prinerger on all servers in the system.
2. On the primary Prinerger server, from the **License** menu, select **Manage License Key**.
3. In the **License Keys** box, select the license key that you want to remove.
4. Click **Remove License Key**.
5. Click **Remove**.
6. Click **Yes** to confirm you want to remove the license key.

Important: Removing a license key disables all associated features.

7. Click **OK**.
8. If you are finished working with licenses, start Prinerger on all servers in the system.
