

Monitoring JTPs

View information such as the name of the JTP, server where the JTP resides, type of JTP or JTP pool, status of the JTP, and so on.

1. In the right pane, click the **JTPs** tab.
The JTP window displays the following information:

Column	Describes
Icon	Graphical indicator of the type of JTP or JTP pool
JTP Name	User-defined name or generic name for the JTP or JTP pool
Server	Which server the JTP is active on This field is left blank for JTP pool entries, because the JTPs in the pool can reside on multiple servers.
Type	Type of JTP or JTP pool
Status	Status of the JTP or JTP pool ○ Starting: It is in the process of being added to the server. ○ Ready: It has been added to the server and is ready to use. ○ Stopped (offline): It has been added to the server but is temporarily disabled.

Tip: To access the JTP configuration commands, right-click in the JTP window.
