

Changing an existing JTP pool

With an existing JTP pool, you can add new JTPs to the pool, remove JTPs you no longer need, or completely delete the pool.

1. On the **JTPs** tab, select the name of the JTP pool to which you want to add a JTP.
2. Perform any of the following actions:

To do this	Do this
Add a JTP to the pool	Click JTP > Properties . In the Selected JTPs in the pool box, select the check box beside each JTP that you want to add.
Remove a JTP from the pool	Click JTP > Properties . In the Selected JTPs in the pool box, select the check box beside each JTP that you want to remove.
Remove the pool completely	Click JTP > Remove JTP pool .

Important: A JTP pool cannot include different types of JTPs. For example, you cannot have an archive JTP in the same pool as a refine JTP. In addition, all JTPs in a pool must have the same features selected.

If you remove a pool, the associated JTPs remain on the Prinergy servers.

3. Click **OK**.
