

Removing a server

Remove a server from the Prinergy system when you no longer need the server.

1. From the **Tools** menu, select **Configure System**.
2. In the Configuration Options dialog box, select the server that you want to remove:

To Remove	Description
Secondary server	Click the Servers tab, and select the server from the Secondary Servers list.
Tertiary server	Click the Servers tab, and select the server from the Tertiary Servers list.
Kodak Veris or Matchprint Virtual software server	Click the Kodak Proofers tab, and select the server.

3. Click **Remove Server** or **Remove** next to the selected server.

Important: Before clicking **Remove Server** or **Remove**, make sure that you want to remove the server. Prinergy automatically removes the server from the system; you are not prompted before the server is removed.
