

Creating the Araxi service account in a Windows domain

If you are in a Windows domain, use the domain controller to create the user account that the Araxi service uses to access Windows servers in the Prinerger system.

If you are re-creating the Araxi service user account in the entire Prinerger system, shut down all servers in the system before you log on to the domain controller.

1. On a **domain controller**, log on as a domain administrator.
2. Create the user account:
 - a. From the **Start** menu, select **Programs > Administrative Tools > Active Directory Users and Computers**.
 - b. On the **Tree** tab, click the domain node to expand the tree.
 - c. Select the folder that contains the Araxi service account.
The default account is called **Araxi**.
If you are not using folders to organize your accounts, the Araxi service account is typically under **Users**.
 - d. If you are re-creating the araxi service user account, right-click the old Araxi service account, select **Delete**, and click **Yes** to confirm.
 - e. Right-click the folder that will contain the Araxi service account, select **New > User**, and follow the prompts.
 - f. Clear the **User must change password at next logon** check box.
3. On the **Primary Server** Enable the user rights for the Araxi service account:
 - a. From the **Start** menu, select **Programs > Administrative Tools > Local Security Policy**.
 - b. On the **Tree** tab, expand **Local Policies**, and select **User Rights Assignment**.
The right pane displays a list of user rights.
 - c. In the right pane, right-click **Act as part of the operating system** and select **Security** or **Properties**.
 - d. Click **Add** or **Add User or Group**, and from the **Name** box, select the Araxi service account, click **Add**, and click **OK**.
The Local Security Policy Setting dialog box appears, and the Araxi service account appears in the **Assigned To** box.
 - e. In the right pane, right-click **Log on as a service**, and select **Security** or **Properties**.
 - f. Click **Add** or **Add User or Group**. From the **Name** box, select the Araxi service account, click **Add**, and click **OK**.
The Local Security Policy Setting dialog box appears, and the Araxi service account appears in the **Assigned To** box.
 - g. Click **OK**.
