

Setting the language of the Preflight+ reports generated from Workshop

Here you set the required languages of the PDF Preflight+ reports generated from Workshop.

1. From the **Tools** menu, select **Configure System**.
2. In the Configuration Options dialog box, click the **Preflight+ Settings** tab.
3. Under **Report Language**, select the check box/es of the language/s that you want to generate Preflight+ reports in.

Notes:

- When you run Preflight+, Prinergy runs the Preflight+ process and generates a separate PDF report in each of the languages chosen above. To open and view any of the reports, go to <server>\Jobs\<jobName>\System\PreflightCallasReport. Reports that were already viewed are located in <server>\Jobs\<jobName>\System\PreflightCallasReportWorking.
- The report displayed when you select the page and then select **Preflight+ Input Files Report Viewer** or **Preflight+ Refined Report Viewer** from the **Job** menu in Workshop, is in the language of your Prinergy client. If your client's language was not chosen in Preferences or if it is not supported by Preflight+ (that is, the client's language is not included in the **Report Language** check boxes in Preferences), the report is displayed in English. If the **English** check box is not selected as one of the **Report Language** options in Preferences, Prinergy displays the report in one of the selected languages.
