

Components of the backup system

A Prinerger backup system consists of several components, which are determined by the backup software you use—such as, Prinerger Configuration Backup.

Component	Prinerger Configuration Backup	Using third-party software
Software to create a database backup file	Oracle Backup Manager	
Software to back up files to media	Prinerger Configuration Backup software	Third-party, Windows-compatible software For example, Legato Networker or Veritas BackupExec
Media	Files only	Media of your choice
Devices	Disk only	A device qualified for Prinerger backup
Removable Storage Manager (RSM)	N/A	Tracks removable storage media and manages devices and media Part of Microsoft Management Console (MMC), which is built into the Windows operating system
