

Performing daily maintenance tasks

Perform these maintenance tasks daily to keep your Prinerger system running in optimum condition.

1. Check your Prinerger system backup:
 - a. On the primary server, start **Prinerger Administrator**.
 - b. From the **Tools** menu, select **System Backup Status**.
2. If applicable, check your data backup.
3. Visually check hardware such as servers, RAID's, or other peripherals and report any error conditions, for example, amber-colored LEDs.
