

File Browser dialog box (process templates)

lists

By default, the list displays the root of the selected process template group, and the list displays the process templates for the selected process template group.
The bottom box displays the process template name.

Volumes

Click this button to display all of the volumes in the Prinergy system.

Show Hidden Files

Select this check box to display hidden files, such as system files, in the list.
You can set the default selection of this check box in the **View** tab of the Workshop Preferences dialog box.
