

Managing Preflight+ profiles

The management of the Preflight+ profiles is performed in the Preflight + Profile Manager software. You view, create, and modify Preflight+ profiles in Preflight+ Profile Manager.

1. From the **Tools** menu, select **Preflight+ Profile Manager**.
The Preflight Profile Manager dialog box appears.
2. Perform one of the following as appropriate:

If You Want To...	Then...
View a profile	Select a profile, click Edit , and in the dialog box that opens, view the defined settings. After viewing the settings, click Cancel .
Add a profile	Click Add , define the settings as desired, and then click OK . If the profile name you typed already exists, in the dialog box that opens, click Change Profile Name , type a new name for the profile, and then click OK . The new profile appears on the list of customized profiles in the left pane.
Edit a profile	Select a profile, click Edit , modify the settings as desired, and then click OK . Notes: • If the profile you selected is in the Locked  status (a system profile), in the dialog box that opens, click Change Profile Name, type a new name for the edited profile, and click OK. • If you changed the name of the profile, in the dialog box that opens, select Replace or Keep Both Profiles.
Copy a profile	Select a profile, click Edit , modify the name of the profile and any other settings as desired, and then click OK . In the dialog box that opens, click Keep Both Profiles .
Remove a profile	Select one or more profiles, and then click Delete . In the confirmation message that appears, click Yes .
