

Setting the order of image search paths

1. Open the job or pre-job.
2. From the **Job** menu, select **Image Search Path**.
3. In the Image Search Paths dialog box, select a folder and click **Move Up** or **Move Down** to move the folder up or down the list.
Move Up and **Move Down** are available only when the **Image search paths** list contains more than one folder.
4. Click **OK**.
