

Using font search paths

Add, delete, or change the order of font search paths.

Note: You may also create a new job and base it on a template job that has the font search path you want to use.

1. From the **Job** menu, select **Font Search Path**.
2. In the Font Search Path dialog box:

To	Do this
Add a font search path	a. Click Add. b. In the Select Folder dialog box, select a folder. Note: By default, the job folder appears, unless the job volume is not mounted. The list displays only folders; it does not display font files. Subfolders are not searched. You need to add a search path for each folder that you want searched. • To add a search path for fonts that have been converted with the Font Converter and are used globally, select the following folder: AraxiVolume on <your primary server>\CreoAraxi\Data\Fonts. • To add a search path for fonts that have been converted with the Font Converter and are job-specific, select the following folder: <Job Folder>\Fonts. c. Click Select "<folder name>".
Delete a font search path	a. Select the font search path folder. b. Click Delete.
Change the font search path order	a. Select the font search path folder. b. Click the Move Up or Move Down buttons to change the order of the selected folder. Note: The system searches through the folders starting at the first one on the list.

3. Click **OK**.
