

Changing a preset

1. In the Digital Job Ticker Editor, from the **Preset** menu, select the preset that you want to change.
2. Change any of the settings.
The preset enters the Edited State—its name turns blue and is preceded by an asterisk.
3. Click  (located on the right of the **Preset** box), and from the menu, select **Save Changes**.
The updated preset is saved on the Prinergy server.

Important: If while making changes to a preset, another user (on another client) performs changes on the same preset and saves these changes, you will not be able to save your changes. If this happens, click  and select **Reload**. This will display the changes saved by the other user and you can proceed from there.
