

Add New Color Library dialog box

Library Name

Type a name for the new library.

Tip: If you choose a name for the color library that begins with System, such as SystemCMYK, SystemLAB, or SystemPackaging (must-be a one-word name), the library will automatically be added to the top of a selected color libraries list, in any new refine or output process template. This is useful when you want to a Global system library added by default to every new refine or output process template.

Select Alternate Color Space

Select an existing color space or select **Define new colorspace** to create a new color space.
