

Overview of core tasks

To set up and output Prinergy LPV publications, perform the following tasks:

1. Create an LPV job.
2. Add and refine input files.
3. Create the version plan.
4. Add versioned pages.
5. Link refined pages.
6. Generate versioned pages.
7. Assign versioned pages to a page set or imposition plan.
8. Output proofs and final output.

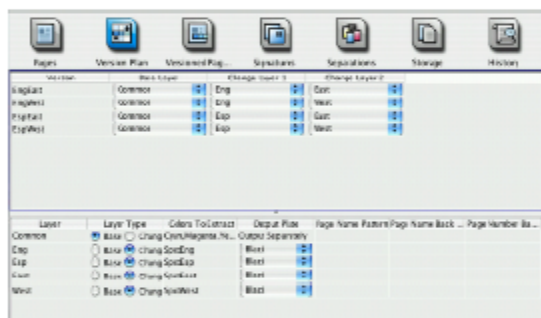

The following figure is a graphic representation of the core LPV tasks.

1 Create an LPV job.

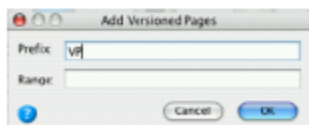

2 Add and refine input files.

3 Create the version plan.

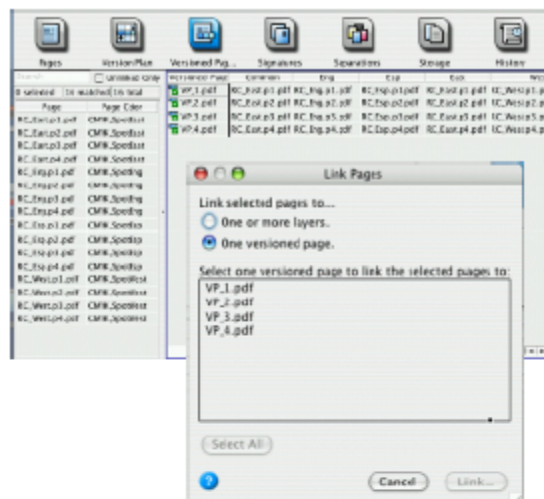

4 Add versioned pages.

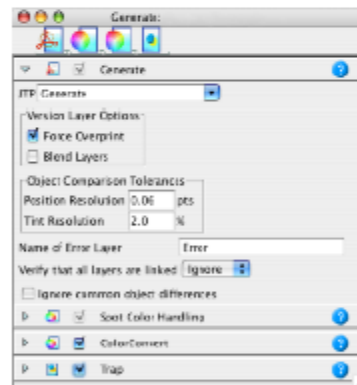

Note: The thumbnails represent dialog boxes that are new or updated for LPV tasks.

5 Link for refined pages.

6 Generate versioned pages.

7 Add and refine input files.

8 Add and refine input files.
