

Prinerger Configuration Backup

A Prinerger Configuration Backup utility is available for backing up Prinerger Workflow systems that are running on Windows Server 2019 and 2022 servers.

Prinerger Configuration Backup backs up the Prinerger and Windows configuration for each Prinerger primary and secondary server in the system to the specified paths and copies the database backup files to the same paths. Additional software configurations such as InSite Prepress Portal, InSite Creative Workflow, and Print Console that may be installed are not backed up.

	Prinerger Configuration Backup
Prinerger version	5.1 or later
Operating system	Windows Server 2019 or Windows Server 2022
Media	File
Backup data	• Oracle database • Prinerger configuration* • Window configuration
Servers that can be backed up	Primary, secondary, and render stations
How to configure	In Prinerger Administrator, click Tools > Backup > Settings button
Backup service name	AraxiSystemBackup

In Prinerger Administrator, you configure and view the status of Prinerger Configuration Backup using **Tools > Backup**. (This dialog box has different content depending on which is set as the preferred backup option.)

* Note: The Prinerger Backup collects the following data from the AraxiPreps share: Marks, Printers, Profiles, Resources, Templates and any custom folders you've added.
