

Changing the license server for DotShop in Mac OS

If you have more than one primary server that has a screening license, you can choose the server that will license DotShop, in the DotShop Preferences dialog box.

1. In Adobe Acrobat, select **Acrobat > Preferences > Prinergy DotShop**.
2. Perform one of the following actions:
 - If you have more than one primary server running the floating license manager on your network, the server names will be in the **License Server** list. Select a server name, and click **OK**.
 - Type a server name or an IP address for a licensed server in the **License Server** box. Click **OK**.
3. Restart DotShop for the new name to become the default license server.
