

Showing or hiding warnings

Typically, you receive warning messages about any limitations or illegal actions during a trapping session. You can suppress these messages from the dialog box that appears so that no more messages appear during the session.

1. From the Acrobat main menu
 - In the Mac OS, select **Acrobat > Preferences > Prinergy DotShop**.
 - In Windows, select **Edit > Preferences > Prinergy DotShop**.
2. Select the **Enable all warning dialogs** check box to view suppressed warnings that occurred during your screening session. If no warnings were suppressed, the check box is not available.
Note: If warnings were suppressed and you want to review them, you can reenable them by selecting the **Enable all warning dialogs** check box. If no warnings were suppressed, the check box is not available.
3. Click **OK**.
