

Selectable object types and icons

When an object or its type, color, screen, or calibration curve is selected, an object type icon appears in the Properties Editor. These icons can then be selected and screening changes applied to the object.

DotShop recognizes the following object types:

- Path object 
- Text object 
- Image 
- Gradient 

The following objects types are also recognized:

- OPI Bypass image 
- PS Bypass image 
- CEPS data 

Note: DotShop does not screen Copydot images.
