

Opening Preflight Locator

1. Click the blue hand  next to the problem you want to view.

Text and Line-Art

Page 1

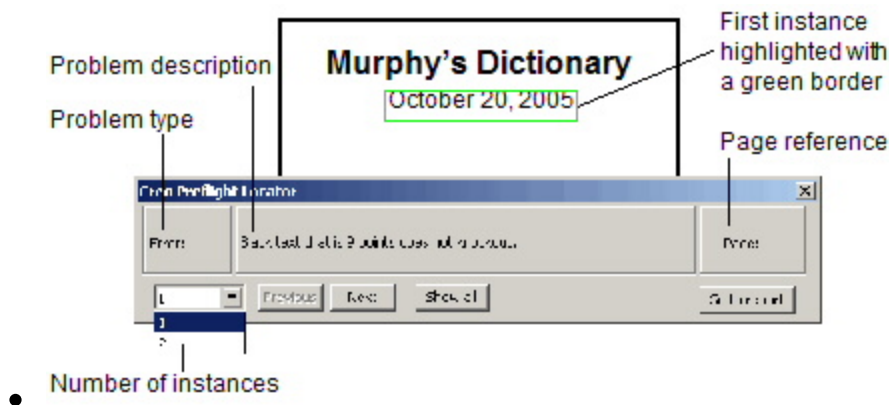

Status	Fix	Detect
 Error		 Black text that is 9 points does not knockout.
		 Black text that is 10 points does not knockout.

Sample PDF Preflight report

The PDF document opens and the first instance of the problem is highlighted with a green border.

The Preflight Locator dialog box also opens and displays the following information:

- The type of problem (warning or error)
- A description of the problem
- A page reference for the problem
- The number of times the problem appears in the document

Sample of preflight page with Preflight Locator dialog box

2. To highlight another instance of this problem, select a number from the list, or click **Previous** or **Next**. To highlight all instances of the problem at the same time, click **Show all**.
