

Ink types and trapping rules

Ink type	Colorstrap to ink?	Underlying inks trapped?	Black trapping rules applied?	What determines trap direction?
Normal	Yes	Yes	Rules are applied if process black or neutral density is greater than the black density limit, or if Treat as Black is selected.	Neutral density
Opaque-solid	Yes	No	Always	Print order
Opaque-screened	Yes	No	Rules are applied if ink intensity is greater than the black color limit.	Neutral density
Opaque ignored	No	No	N/A	N/A
Transparent (or die line)	No	Yes	N/A	N/A
