

Finding selected items easily0

Choose the colors that objects, traps, borders, and highlights will appear in when you select them in the Properties Editor.

The PDF Trap Editor's flashing highlight makes selected items easier to see in the Acrobat window.

To find a selected item:

- In Mac OS, click and hold one or more items in the Properties Editor.
- In Windows, click and hold the left mouse button on one or more items in the Properties Editor.

The selected item or items flash with the highlight color that you specified in the **Preferences** menu.

Tip: Using the flashing highlight feature is helpful for highlighting a group of items with the same characteristics to check that the items have been trapped or edited correctly.
