

Highlighting all traps

Highlighting all traps increases the visibility of traps in the PDF so that you can check and/or edit the traps more easily. The feature cannot be used with **Hide traps**.

1. On the lower toolbar in the Properties Editor/Viewer, click the **Highlight traps**  button. All traps appear in the PDF in the highlight color that you selected when setting up PDF Trap Editor.
2. When ready, click the **Highlight traps** button again to turn off the highlighting.
