

Trapping a page

You can trap a page using the same trapping parameters for all traps.

Note: If you open a file that contains advanced traps, you can retrap the page using PDF Trap Editor. The advanced traps will remain unless you specifically delete or retrap them.

1. From PDF Trap Editor, click the **Trap Page**  button .
2. Select either the Simplified or the Detailed view of the Trap Selection dialog box.
3. Perform one of the following actions:
 - Specify trap attributes according to your press operator's recommendations about trap size and (ink) print order.
 - Click the **Load** button to load a previously saved trap set.
4. If the page has been previously trapped, select **Delete existing traps**.
5. Click **Trap Page**.
