

Adding preview files to a window

Use the **Add Preview Files** menu item to add preview files to window. If you use the **Open Preview Files** menu item, the files will open in a new window.

1. From the **File** menu, select **Add Preview Files**.
The Add Separation Files dialog box appears.
2. The dialog box shows the **Front Surface** and **Back Surface** tabs. If the tab for the surface to which you want to add files is not already selected, select it.
3. Click **Add**.
A standard dialog box for choosing a file appears.
4. Select the files you want to open, then click **Add**.
The Add Separation Files dialog box reappears, showing all the files that will be opened.
5. Click **OK**.

The new files are added to the current window.
