

Measurement palette

The values displayed in the **Measurement** palette are explained in the following table:

Measurement	Description
Distance Angle	Length of the line drawn; angle of the line drawn.
Delta (h, v)	Horizontal distance of the line drawn; vertical distance of the line drawn.
Current (h, v)	Current horizontal distance of the pointer from the upper-left corner of the press sheet; current vertical distance of the pointer from the upper-left corner of the press sheet. When the Measure tool is active, the current measurements are updated whenever you move the pointer.

The unit of measure and number of digits after the decimal point in the **Measurement** palette are set in the measurement preferences.
