

Setting preferences

Enter the default settings for your system.

1. Open Prinergy VPS preferences:
 - In Mac OS, click **Prinergy VPS > Preferences**.
 - In Windows, click **Edit > Preferences**.
2. Click the **Sheet**, **Navigation**, or **Measurement** tab.
 - **Sheet**: Set default colors for various Prinergy VPS software elements and options when a job is first opened.
 - **Navigation**: Set default colors for elements in the **Navigation** palette and indicate whether the entire image should always be displayed when a job opens.
 - **Measurement**: Set the default unit of measure and number of digits after the decimal point for measurements.
