

What is Prinergy Workflow?

Prinergy Workflow is a PDF-based prepress workflow and content management tool that organizes prepress and plate production.

Prinergy Workflow is a complete workflow management solution for commercial and publication printers. Tasks such as file optimization, trapping, proofing, imposition, archiving, job tracking, and plate making are automated and managed by the system for increased process control and productivity.

Prinergy Workflow provides an environment in which prepress operators can work individually or as a team to process incoming data for output. It increases operator efficiency by providing a context for each job, tools to automate repetitive tasks, and status information to help tune the production process.
