

# Installing Workshop

To install Workshop on a client computer:

1. Connect to the Prinerger server by mounting a volume (Mac) or mapping a drive (Windows).
2. In the wkspInstall folder for your operating system, locate the Mac OS `//<ServerName>/wkspInstall/MacOSX/ WorkshopInstaller.app` command file or the Windows `\\<ServerName>\wkspInstall\Windows \WorkshopInstallerShortcut.exe` command file, and then perform the following action:
  - (Mac OS) Double-click the WorkshopInstaller command file, click the lock icon in the Authentication dialog box, type the Administrator account name and password, and click **OK**.
  - (Windows) Double-click the WorkshopInstallerShortcut.exe file.

The installer wizard appears.

3. Follow the instructions in the wizard to install the software.

For more information about installing Workshop, see the *Prinerger System Administration Guide*.
