

Starting Workshop

To start Workshop:

1. Double-click the Workshop icon on your client desktop.
The Connect to Server dialog box appears.
2. If your system has more than one Prinerger primary server, in the **Server** list, select the primary server that you want to use.
If the **Server** list does not display the server that you want, the server may be in a different Windows subnet. In that case, select **Other**. In the Enter Host Name dialog box, type the name of the server and then click **OK**.
Compare the number of the Workshop version with the number in the **Server Version** field. If the numbers are different, update Prinerger Workshop now.
3. In the **User name** box, type your user name.
4. In the **Password** box, type your password.
5. Click **Login**.

Job Finder appears. You are now ready to use Workshop.
