

Layered PDF Versioning (LPV)

For Layered PDF Versioning jobs, the following buttons also appear across the top of Job Manager:

- **Version Plan**—displays a table in each LPV job that you must set up to reflect the layers required for each version.
- **Versioned Pages**—displays a collection of refined pages that make up all versions of a single page, including the required layers for each version.

For information about Layered PDF Versioning, see the *Versioning* chapter in the *Prinergy Workshop User Guide*.
