

Imposition

1. Create or import an imposition, and assign pages if necessary.
You see the imposition plan in the **Imposition Plans** pane. If the imposition had assigned page positions, the job's pages are automatically assigned to the positions. You can also see a record of the action in **History** view.
2. Set page geometry.
3. Adjust settings in preparation for generating an imposition proof.
4. Generate a proof of the imposition. Proofs can be soft proofs (viewed on the computer monitor) or hard proofs (printed).
You can review the proof. You can also see a record of the action in **History** view.
5. Approve proofs.
