

To create an imposition with integrated Preps software

1. In Workshop, perform the following actions:
 - a. Set up a job, add input files, and refine the pages.
 - b. From the **File** menu, select **Create New Imposition**.
 - c. In the New Imposition dialog box, enter the imposition name.
 - d. Select the **Use External Imposition Application** option and select the Preps application.
 - e. Select an import type, and click **OK**.
 - f. In the New Imposition Details dialog box, select an existing page set or create a new page set, and click **OK**.
Preps starts.
2. In Preps, perform the following actions:
 - a. Select template(s) to use for the new imposition.
See the Preps documentation.
 - b. Print the imposition.
The imposition appears in Workshop.
