

Download a low-resolution PDF version of an element

You can download a low-resolution PDF version of an element from a project or library.

Requirements: You must have a project or a library role that includes the Download LowRes PDF user right.

1. In the **Elements** view, select the element or folder that you want to download.
2. Select **Download > LowRes PDF**.
The PDF download window appears.
3. Select the resolution for the PDF file.
4. Click **Download**.
Note: According to the browser settings, the file is downloaded to the default location and /or appears in the browser window. Configure the browser to specify the download location and the way to handle download files.
5. When the download is complete, click **Close**.
