

Hiding the third image that displays the difference between two images

You can hide the third image if you want to simply view two images next to each other for comparison.

1. In Compare mode, click the arrow next to the **Compare View** button and in the list that appears, clear the **Show Comparison View** option.
The third image disappears.
2. To display the third image again, click the arrow next to the **Compare View** button and in the list that appears, select the **Show Comparison View** option.
